Full Stack Developer | PHP & Laravel

Results-driven Full Stack Developer with 3+ years of experience specializing in PHP, Laravel, API integrations, and POS systems. Expertise in developing scalable web applications, optimizing business processes, and implementing advanced reporting solutions. Passionate about delivering high-performance solutions for business growth.

Education

- | | |
|--|-----------------------|
| • B.S Computer Science - Virtual University of Pakistan | 2023 – Present |
| • B.Com – University of Sindh | 2019 – 2023 |

Technical Skills

- **Backend:** PHP, Laravel, MySQL, API Development, MVC Architecture
- **Frontend:** HTML5, CSS3, JavaScript, jQuery, Bootstrap
- **Tools & Integrations:** Git, QuickBooks, Stripe, XML, POS Systems, Loyalty Programs, Microsoft Dynamics, Firebase

Professional Experience

- | | |
|--|---------------------------|
| Software Developer SYMITS | Feb 2024 – Present |
| • Developed an Offline POS System, allowing order punching without internet connectivity. | |
| • Integrated Microsoft Dynamics for seamless day-end ledger report posting (credit & debit). | |
| • Implemented Firebase for real-time order tracking, enhancing operational efficiency. | |
| • Designed a Pre-Ordering System, notifying users and cashiers instantly about placed orders. | |
| • Developed a Split Bill System, enabling customers to divide bills across multiple accounts efficiently. | |
| • Led the development of a Finance Ledger System, handling purchase items, stock adjustments, order punching, and refunds. | |

- | | |
|---|----------------------------|
| Senior Web Developer Orio Technologies Pvt. Ltd. | Jun 2021 – Feb 2024 |
| • Led the development & maintenance of web applications using PHP & Laravel. | |
| • Developed an admin chat system for user-to-admin communication. | |
| • Created REST APIs for third-party integrations, improving interoperability. | |
| • Worked on performance optimization & database efficiency with MySQL indexing. | |

Key Projects

- Offline POS System (Laravel) – Developed a fully functional offline POS that allows order punching without internet and syncs data when online.
- Microsoft Dynamics Integration – Implemented ledger report posting for daily transactions, managing credit & debit entries.
- Firebase Real-Time Ordering – Integrated Firebase to track online orders in real time, enhancing efficiency for businesses.
- Pre-Ordering System – Developed a pre-ordering system to notify users and cashiers about upcoming orders.
- Split Bill System – Enabled bill splitting among multiple users, ensuring seamless order processing.
- Finance Ledger System – Built a comprehensive ledger module to manage purchases, stock adjustments, order punching, and refunds.
- JGI Re-Insurance Admin Panel (Laravel) – Automated policy data retrieval from Oracle DB and streamlined re-insurance processes.
- URS Learn (Laravel) – Built an e-learning platform with secure Stripe payment integration.

Certifications & Achievements

- Appreciation Letter from SYMITS for outstanding contributions in software development.
- Laravel API Development Mastery – Udemy
